- Shuttle Car
  - Operators Cab
  - Suspension System

- Continuous Miner
  - Increasing Bolter Platform Space
  - Retro Kit Two Handed Bolting Controls

OLD STYLE CAB
Joy Shuttle Car Suspension

Purpose of Design

To isolate and reduce the shock and vibration forces that are generated by tramming over bad bottom from being transmitted to the frame and body of the shuttle car.

Joy Shuttle Car Suspension

- Four wheel independent operation
- Proven design
- Uses existing wheel units
- Simple, robust design for easy care / long life
